- System and reminder "Alert" messages shown in Sentinel and MAXIMUS II homepages
- Status review for department and higher managers.

**Appraise** is a purpose designed, on-line, employee Self-Appraisal system designed for maximum flexibility, customisation and efficiency.

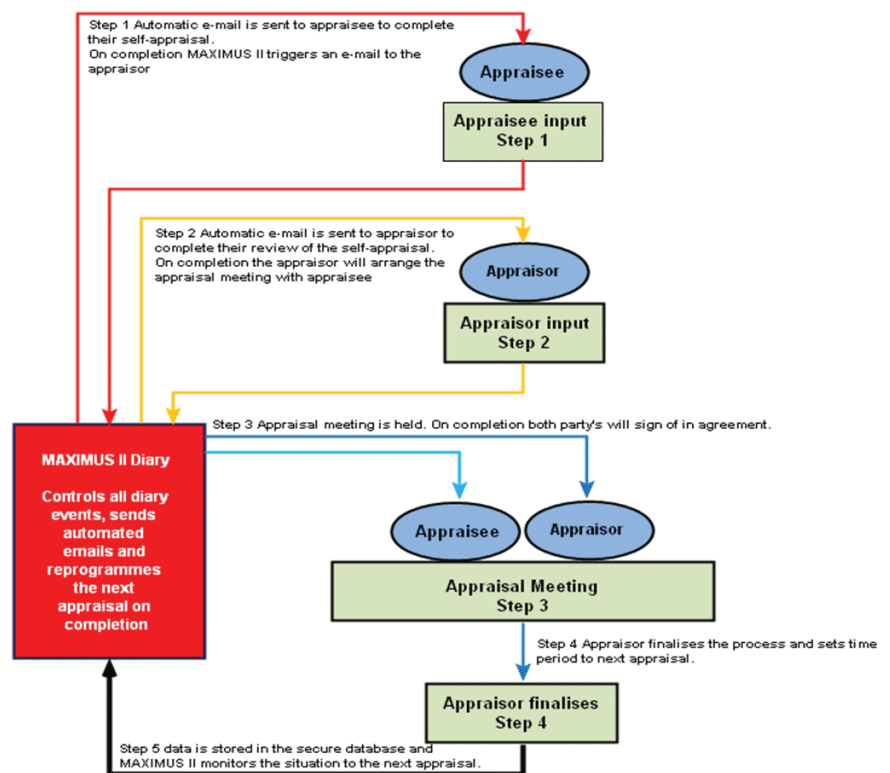

When a new employee is entered into the system for their first day the MAXIMUS II diary programme will organise and manage both their initial Inductus health & Safety induction and following staff appraisals.

**Appraise** requires a minimum of head office organisation and monitoring for real cost savings.

Different question sets are established for each department or grade and the employee simply assesses themselves prior to their appraisal interview.

**Appraise** can be customised to your corporate colour scheme and appear in your organisation intranet as a company resource.

Once the interview is completed and the grading process finalised between the appraiser and appraisee, Appraise will re-programme the next appraisal time and add the data to the management reports.
